Target audience

General practitioners in roles dealing with relationship management, credit, compliance, etc., have an interest in trade finance and work in banks, corporates, or financial institutions.

Course objectives

Supply chain finance can improve real-time information flow in global trade to boost management efficiency. Through the Supply Chain Finance Bundle, which combines both introductory and advanced level courses, you can discover how various supply chain finance products meet the financing and risk mitigation needs at different stages of the supply chain.

In the introduction course, learn to engage effectively and credibly with clients by proposing tailored supply chain finance techniques as potential solutions to suit the interests of importers and exporters. In addition, explore the nature of

supply chain finance relative to traditional trade financing options, such as documentary letters of credit.

In the advanced course, learn to help your clients through various stages in the supply chain, while understanding the importance of the factors and processes involved to best identify the optimum supply chain finance solution for them. This course will also take you through the effectiveness, scope and scalability of currently available supply chain finance products and examine the potential of future products to help you meet any unmet or latent client needs.

Why take the bundle?

- Understand the value of supply chain management and its business processes to improve client organisational profitability
- Identify supply chain finance regulatory, accounting, and reporting considerations to meet and overcome challenges with confidence
- Learn about the innovations being developed by banks and their impact on technologies, such as blockchain, to deliver an ever more positive client experience
